

JUDE OLUBUSORO

Frontend & Mobile Software Engineer

Lagos, Nigeria | judeolubusoro@gmail.com | +234 913 848 3805 | [linkedin.com/in/judeiyanu](https://www.linkedin.com/in/judeiyanu) | github.com/olubusoro | julus-jude.dev

SUMMARY

I build frontend and mobile products end to end, most recently Kribb, a React Native app now sitting at 50+ downloads, 22 users, and 18+ testers ahead of its full Play Store launch. Before that, I shipped RBAC dashboards and a CMS at Chamsswitch. I like taking a design file and turning it into something people actually open and use, whether that's on web or mobile.

SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React, Next.js, Tailwind CSS

Mobile: React Native

Backend & Data: Node.js, Supabase, MongoDB, .NET SDK

Tools & Design: Figma, Canva, Docker, Git/GitHub

AI-Assisted Development: GitHub Copilot, Claude — prompt engineering for accelerated development

EXPERIENCE

Mobile Developer — Langmaster*June 2025 – July 2026*

Remote

- Build and maintain the mobile screens for our React Native product, and own the codebase alongside the rest of the app's architecture.
- Wire the app up to our backend, consuming endpoints and managing state across features as they ship.
- Bring technical reviews to standups and pull requests, catching issues before they reach the rest of the team.

Frontend Developer Intern — Chamsswitch*Apr 2025 – Sep 2025*

Victoria Island, Lagos, Nigeria

- Built and structured frontend architecture for two internal platforms: a Knowledge Management System (KMS) and a payroll system.
- Designed and implemented Role-Based Access Control (RBAC) dashboards across both projects.
- Implemented a WYSIWYG rich-text editor within the KMS platform.

Frontend Developer — Contract — Freelance, Event Management Client*Mar 2025*

Remote

- Built a custom booking portal for a bespoke event management company as sole freelance developer.
- Integrated Calendly for scheduling and a payment gateway to handle booking transactions end-to-end.

PROJECTS

Kribb — *React Native, Supabase*

- Mobile app where landlords list verified apartments and tenants find them without the usual back-and-forth. Currently at 50+ downloads, 22 users, and 18+ testers, ahead of a full Play Store launch.

NACOS Portal — *React, Tailwind CSS*

- Led development of a centralized portal for NACOS at Anchor University, lecture notes, past questions, executive info, and event updates in one place.

CS-KMS — *React*

- Knowledge management system built for Chamsswitch to centralize internal company documentation.

VeriMap — *React, Python, Node.js, MongoDB*

- AI-powered system that verifies the legitimacy of reported disasters using remote sensing data and a CNN model.

EDUCATION

B.Sc. Computer Science — Anchor University, Lagos*Sep 2022 – Aug 2026*

VOLUNTEER

Mobile Dev Instructor — NACOS Launchpad, Anchor University*May 2026 – Present*

- Teach React Native fundamentals to student developers on the program's mobile track — components, navigation, state management, and consuming APIs.
